

# AXIOM H2

CELLULAR OPTIMIZATION

# INTRO

Have you ever wondered what molecular hydrogen is and why it holds such incredible potential for enhancing your life?

Molecular hydrogen, often referred to as H<sub>2</sub>, is the smallest and most bioavailable molecule and a fundamental element for optimal health and well-being. Its tiny molecular size allows it to penetrate deep into your cells, combating harmful free radicals and reducing oxidative stress.

Until now it has been proven to help with over 170 different common types of diseases and is 100% safe for humans and animals.

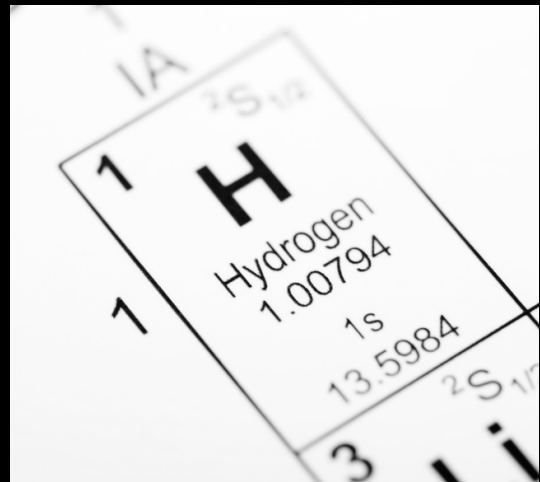

By incorporating molecular hydrogen into your daily routine, you can experience improved energy levels, enhanced athletic performance, accelerated recovery, and a heightened sense of vitality. Say goodbye to inflammation, support your immune system, promote cellular rejuvenation, protect your DNA, and much more!

Now, imagine having access to the purest and most effective molecular hydrogen technology out there. After 7 years of research and trial and error with other brands, Mateo Johnson decided to create his version of the most advanced cutting-edge technology for the production of molecular hydrogen gas out there! These machines deliver pure molecular hydrogen gas that can be used for different types of therapies.

You can embrace the power of molecular hydrogen with Axiom H<sub>2</sub> machines or tablets and unlock a new chapter of wellness and vitality. It's time to elevate your health and rewrite the story of your well-being.

# HOW DOES HYDROGEN BENEFIT THE BODY?

In scientific terms, hydrogen therapy is directly neutralizing ROS (reactive oxygen species) and hydroxyl radicals that are in and produced by our cells. This helps with many functions such as restoring negative charge to our red blood cells which prevents coagulation; improving and restoring electron flow in the mitochondria; reducing inflammation throughout the entire body; balancing hormones; restoring proper function of all organs; and constantly working to bring all systems in the body back to a state of homeostasis.

A simpler way to look at it is like this: Hydrogen therapy works like a mechanic in the body. Hydrogen comes into the body and remains for about an hour before leaving. In that time it is working, cleaning, repairing, and improving. Then once it leaves, everything is running better, electrons are restored, filters like the liver and lymph nodes are cleaned, all your cells are hydrated, and oxidative stress is reduced. Each time you intake hydrogen, it's like getting a tune-up on every system in your body.

## CAN I OVERDOSE ON HYDROGEN? IS THERE SUCH A THING AS TAKING TOO MUCH?

No! Molecular hydrogen will not be stored in the body for long periods of time. The “excess” will be released through your exhalations allowing your body to release any amounts of hydrogen it no longer needs. You will only receive the amount of hydrogen that your body requires and get the benefits from this; you will not have issues of overdosing on molecular hydrogen.

## WHAT ARE SOME BENEFITS I COULD EXPECT AFTER MY FIRST FEW SESSIONS OF HYDROGEN THERAPY?

Hydrogen therapy works as an antioxidant, anti-inflammatory & anti-aging molecule that can be used regularly to promote many health benefits such as:

- A clearer mind with less brain fog
- More positive emotions
- Improved gut health
- Cleaner and more robust lungs
- Better sleep quality
- Higher energy levels
- Increased liver functioning
- Healthier immune system
- Improved blood circulation
- Faster recovery time after exercising or injury

# AXIOM H2 PRODUCTS

## AXIOM H2 CELLULAR OPTIMIZATORS

The ultimate solution for restoring the health of your cells and body. These cutting-edge machines produce hydrogen gas for inhalation and offer the ability to infuse hydrogen into water. This machine can upgrade your life and business. Both HW600 and HW300 give you 4 different types of therapy.

## H2 SSH TABLETS

The benefits of Axiom H2's oral SSH (Solid State Hydrogen) tablets in the body are due to the antioxidant properties of H<sub>2</sub>, which results in the following benefits: works against apoptosis, anti-inflammatory, increases energy, fights cell mutation, improves sleep, regulates metabolism, anti-aging, repairs tissue, reduces fatigue, improves immune function, and more...

# DIFFERENCE BETWEEN MACHINES

## HW600 VS HW300

The main contrast between these two machines lies in the amount of molecular hydrogen produced. The HW600 generates 600 ml/min of pure hydrogen gas, providing faster results, while the HW300 generates 300 ml/min. Both machines feature two ports, enabling simultaneous sessions or accommodating two individuals. The complete kit comes with both machines. The HW600 is designed for personal and business use, while the HW300 is recommended for personal use only. The only requirement for operating the machines is distilled water.

**HW600**

**HW300**

## COMMERCIAL UNIT

This powerful unit is mainly made for businesses. It produces 2000 ml/min of pure molecular hydrogen gas and 1000 ml/min of oxygen. You can combine both gasses and inhale them at the same time or inhale each gas separately. This unit is a perfect solution for people who are dealing with serious health conditions. It also allows you to create all four types of therapy.

**HW - 3L**

# WHAT IS THE MAIN DIFFERENCE BETWEEN MACHINES & TABLETS?

## MACHINES

## TABLETS

<b>COST</b>	\$3500 for 300mL model \$6500 for 600mL model \$20000 for 3000mL model	\$50 for one bottle of 30 tablets
<b>HOW LONG IT LASTS?</b>	Machines can be used daily for up to 8 years with proper maintenance and replacing of certain hardware on it.	One bottle, when taking 1 pill a day, can last about 1 month. Up to 3 pills a day (similar effects as inhalation), last 10 days
<b>ACCESSIBILITY</b>	Generators are larger to travel with and need an electrical outlet to receive the therapy.	Easily transportable, can take a bottle of tablets with you anywhere you go.
<b>EASE OF USE</b>	Takes minimal maintenance of filling up, plugging in, and sitting to intake the hydrogen through whichever intake method you choose.	Very easy – just take one tablet a day first thing in the morning on an empty stomach or before bed.
<b>TIME NEEDS</b>	5-10 minutes to infuse water, inhale or intake hydrogen through goggles or earphones. Time needs increase by your specific needs – a proper intake session can take 15 minutes to one hour, 1-3x a day.	Minimal – less than 1 minute to take the pill and then go about your day; molecular hydrogen is released usually within 10 minutes .
<b>HOW HYDROGEN IS ABSORBED IN BODY?</b>	Water infusion and inhalation go directly into the bloodstream and then throughout the entire body, eye goggles go into the eyes, and earphones into the ears.	Affects gut health the most as hydrogen is being absorbed directly through the gut, then to entire body .
<b>POTENCY</b>	Highest saturation levels of hydrogen occur via inhalation and water infusion as this directly brings hydrogen into all cells of the body through the bloodstream.	Still fairly high levels of hydrogen (about 12L of hydrogen in one tablet) but is local to the gut and then dispersed throughout the body which is a slower and less effective release rate .

# WHAT DO YOU GET WITH YOUR AXIOM H2 MACHINE?

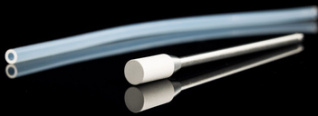

\*HW600 & HW300 model\*

## GAS INHALATION

Experience the highest concentration of molecular hydrogen with the gas inhalation feature of the Axiom H2 machine.

## WATER INFUSION

This advanced technology infuses molecular hydrogen directly into your drinking water, creating hydrogen-rich water that you can consume daily.

## EARPHONES

By delivering molecular hydrogen directly to your ears, you can support overall brain health and cognitive function.

## EYE GOGGLES

Experience the soothing and rejuvenating effects of molecular hydrogen as it nourishes and revitalizes your delicate eye area.

# WHAT IS THE DIFFERENCE BETWEEN THE AXIOM H2 MACHINES & OTHER BRANDS?

You may find a similar outer shell on the market but Axiom H2 machines have completely different inner workings than most others, and here are some of the differences we provide in our machines and as a company:

- We have worked with our engineers to improve the PEM (the main component for how hydrogen gets extracted from the distilled water) and added an ion exchange resin circulation filter system.
- Our machines include a self-diagnostic analysis that relies on seven different sensors to ensure the hardware is working properly.
- We have completed more tests and research to ensure the highest quality product is being given to our customers AND we share those results publicly with YOU the customer.
- The machine can run up to 10 hours without needing to shut off due to overheating, which is a common problem with other machines.
- Perhaps the most important piece is our machines being able to produce 300mL or 600mL of hydrogen a minute, which is double and quadruple times the amount needed for therapeutic doses (therapeutic dose ~150mL/min). - now we also have a 3000mL model which is used at Cancer rehabilitation centers and this one produces 2000mL of pure molecular hydrogen and 1000mL of oxygen which can be taken together or separately!
- We provide real-life agents to talk to over the phone, as opposed to just a chatbot or email address, also people in our sales team have certification from the leading hydrogen research institute in the USA - Molecular Hydrogen Institute
- This machine does NOT require lye aka sodium hydroxide which other brands require, meaning you just get straight, clean hydrogen with no other additives.
- We offer a 2-year warranty compared to other companies of 6-12 months
- Axiom machines have two gas outlets, which allow for the option of full power by combining the two ports or the option to split them between two people or to receive two different therapies at the same time (for example: eyes and ears treatment, breathing and eye treatment, water infusion and ear therapy etc).
- Axiom H2 machines maintain high hydrogen saturation levels in water for many days (even up to 14 days!) in a stainless steel or glass bottle/container with a secure lid.

Axiom H2 is more than just a business. We are a movement of like-minded individuals hoping to create education and inspiration through our mission of healing and thriving with hydrogen therapy!

# WANT TO KNOW MORE?

## MORE ABOUT MACHINES

Axiom H2 machines use a stainless steel diffusion rod with the smallest micron size to ensure the smallest bubbles which results in higher hydrogen saturation in the water (~1.5ppm and -800 ORP). The specific method of electrolysis is using a PEM (proton exchange membrane). There is a cathode and an anode, titanium, and platinum plates that go inside water. When these opposite charged (+ and -) plates are given electricity, it will detach the hydrogen from the oxygen. Once that hydrogen is separated it is now in gas form and can be collected for usage. This specific type of electrolysis doesn't require sodium hydroxide aka Lye (which was/is used in some other hydrogen machines). Instead, we have a chemical-free process with only one input: distilled water. Also, pH of the water is not changed once you infuse H2 in it!

## WHICH TESTS HAVE BEEN DONE ON THE AXIOM H2 HYDROGEN MACHINE?

We are the only company we know of completing a gas analysis to prove the efficacy of our machine. We do this to be as transparent as possible with the quality and concentration of hydrogen from our machines. We have done extensive testing with our machine to test gas production, and gas quality to ensure no other chemicals are leaching into the machine – meaning you are only receiving pure, medical-grade hydrogen. You can ask me for the link to view the videos demonstrating the results of our tests that show hydrogen saturation levels in water via a digital saturation meter and H2 blue drops.

## OZONE VS HYDROGEN

While O-zone therapy can offer benefits such as balancing gut bacteria and boosting the immune system, it comes with potential risks and detox symptoms due to its highly oxidative nature. Overdosing on ozone can be harmful, and it should only be used in small doses for acute issues rather than regular use. Additionally, multiple sessions may be required to fully address a viral infection. On the other hand, molecular hydrogen provides similar benefits to ozone therapy in a gentle manner, without the risk of harm or overdosing. Hydrogen therapy can be safely used daily to maintain optimal health, and it can also be effective for addressing acute health conditions and minimizing symptoms. By working at a cellular level, hydrogen therapy acts as an antioxidant, reducing oxidative stress and promoting proper, healthy functioning of the body.

## **HYDROGEN WATER BOTTLES**

Until now, we haven't found any brand we can confidently recommend. Those bottles often manipulate the pH to generate hydrogen that isn't stable and disappears from the bottle within 2 hours. Moreover, they lack sensors to ensure no chemicals are leaching into the water. While hydrogen-rich water has shown promising results for many conditions, hydrogen gas therapy has proven even more effective. Why? There's a limit to how much water one can drink in a day, and to derive any benefits from these water bottles, you'd need to consume it continuously throughout the day. With hydrogen gas, you have access to unlimited amounts of H<sub>2</sub>, and all you have to do is breathe. Additionally, our machines come equipped with an infusion rod that can create hydrogen-rich water. Our method involves infusing gas into the water with minimal changes in pH. We've also conducted tests on water saturation, and even after 14 days, our water retained available hydrogen.

## **WATER IONIZERS VS AXIOM H2**

The technology utilized by water ionizers differs significantly from that of Axiom H<sub>2</sub>. While water ionizers produce molecular hydrogen as a byproduct of altering pH levels, our machines utilize distilled water to separate H<sub>2</sub>O molecules and deliver pure H<sub>2</sub> gas. Unlike water ionizers, which require prefilters and filters to render drinkable hydrogen-rich water from tap water, our machines eliminate the need for such additional components. Moreover, our machines offer versatility, allowing for four different types of therapy, compared to the single functionality of water ionizers. With Axiom H<sub>2</sub> machines, there's no need for filter replacements or annual cleanings, and there's no risk of leaching heavy metals or other contaminants commonly associated with water ionizers, particularly when using highly acidic or alkaline waters. Additionally, our machines are equipped with dedicated sensors to ensure that you receive only pure H<sub>2</sub> gas and nothing else. You get to choose what kind of water you want to infuse with H<sub>2</sub> and you do not need to depend solely on your municipal tap water!

## **WILL I HAVE ANY DETOX SYMPTOMS?**

Detox symptoms can vary widely from person to person, depending on factors such as your body's toxic load and any existing health conditions. Our tablets serve as an excellent indicator of your gut health status, often giving symptoms that resolve within a couple of days. It's important not to be alarmed by these symptoms, as they signify the body's natural process of repair and restoration facilitated by H<sub>2</sub> therapy. The intensity of these symptoms often correlates with the distance from homeostasis, indicating that your body is actively addressing underlying imbalances. Therefore, as your body becomes more balanced over time, you may notice a reduction in the intensity of H<sub>2</sub> effects, which is actually a positive indication of improved health and well-being.

# LOGISTICS QUESTIONS

## **WHICH COUNTRIES DO YOU SHIP TO, AND HOW LONG WILL IT TAKE?**

*We ship to most countries including the USA, Europe, Canada, Central America, Asia, and Australia. We appreciate your understanding that we are a small, independent business and that our delivery time to most countries can take anywhere from 10-30 business days to receive your generator during high-demand times. As we grow as a business, we hope to improve delivery times greatly.*

## **HOW MUCH IS SHIPPING?**

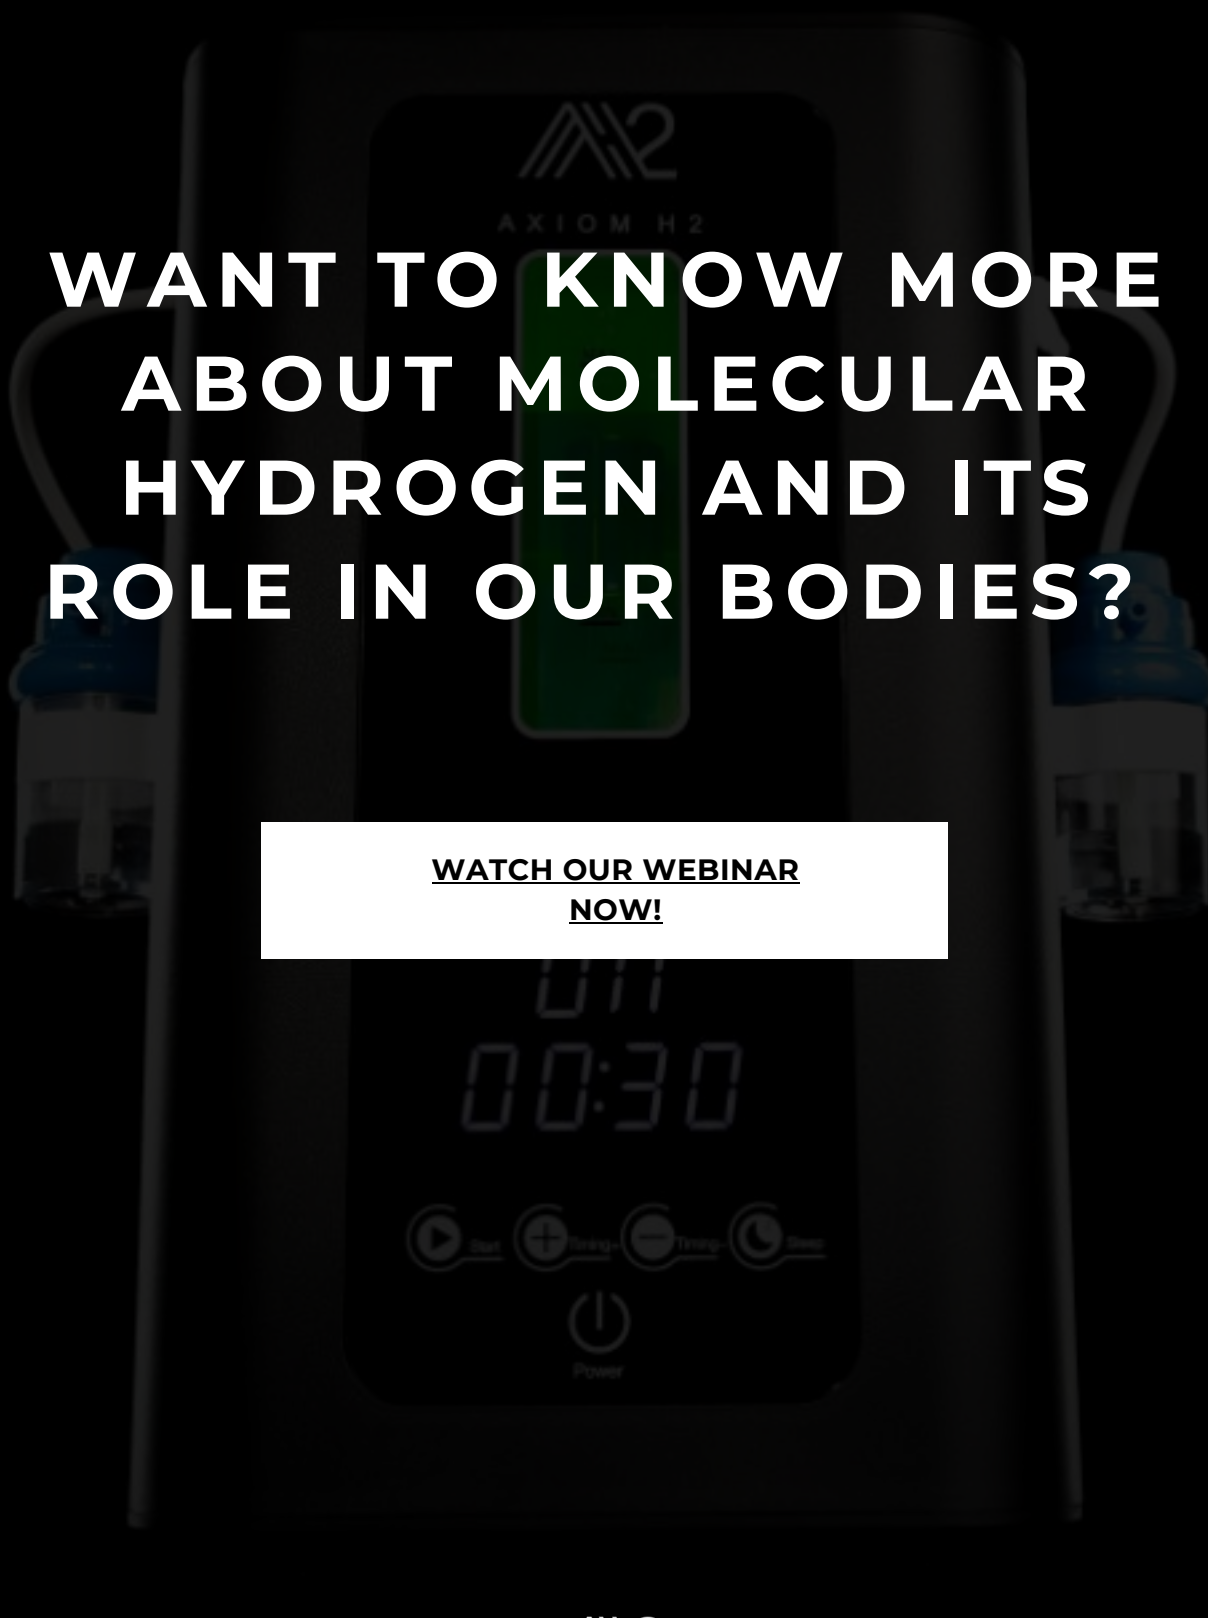

*Asia and most of Europe is around \$18 for tablets. Canada is around \$15 for tablets. We offer free shipping for the generator kits.*

## **DO YOU OFFER PAYMENT PLANS FOR THE GENERATOR KITS?**

*Axiom H2 offers layaway and we offer an interest-free payment plan option through Klarna on our website for US customers only. This will split the cost into 4 payments and only requires a soft credit check. Some customers may also have the option of payment plans and or financing via PayPal. As of recently, we have an option where you can pay for the machine down as a deposit and the other half in payment over 12 months.*

## **CAN I RETURN THE AXIOM H2 MACHINE AFTER RECEIVING IT? WILL I GET A REFUND?**

*Due to this being a medical-grade device, we do not offer a return or refund policy. However, we do have an extended warranty for 2 years which will cover issues relating to the PEM and internal hardware. This warranty can only be honored if proper maintenance is taking place. That includes proper water filling and draining procedures, keeping the unit out of direct sunlight and hazardous outdoor conditions, and avoiding dropping or impacting the machine.*

The background of the image is a dark, semi-transparent view of the Axiom H2 hydrogen generator's control panel. At the top, the Axiom H2 logo is visible. Below it, a green vertical bar indicates the hydrogen level. A digital display shows '00:30'. Below the display are four buttons: Start, Increase, Decrease, and Sleep. At the bottom is a Power button.
